

For over 85 years, Western Nebraska Community College has provided a quality education at an affordable price for students looking to find their dream careers.

“We train our students to enter the workforce or transfer to a four year college or university immediately upon completion, allowing them to pursue their lifelong dreams.”

We understand that classes don't fit into everyone's schedule, which is why we offer online degree programs in business administration, information technology, criminal justice, and more.

“There's nearly 100 different flexible programs ranging from retail management, art, and auto body technology. There's really something unique for everybody.”

“My professors take an active interest in my success. They've become my mentors, helping me receive my diploma and start my future.”

For those who want to work AND play, our competitive sports teams have made regional and national championships.

With three campus locations, we make enhancing your education convenient and local. Register today at Western Nebraska Community College: your future begins here.
